## Minnesota UI Amount Balance File

## Comma Delimited File Format

The format below outlines the data layout for the amount due file for each employer and agent. The amount due is the sum of all unpaid debits on an account that have not been referred to DOR Collections. The Employer Amount Due file will contain the amount due for that employer. The Agent Amount Due file will contain an itemized list of the amount due for each employer assigned to the agent. Both files are formatted the same.

Header Record - The header record will be the first line of the file. The information identifies the agent and file related to the errors.
